HSC 292 – Community Public Health	HSC 190
HSC 390 – Drugs in Society	Junior standing and admission to minor

- 📖 Minor courses in the Department of Health Sciences are major blocked each semester. A limited number of seats are available for minors in each course. **The PE advisor compiles the list of PE majors/HED minors who will receive overrides into HSC 190 and HSC 293 each fall.** For all other HED TE minor courses, overrides are managed by the HSC advisor. Non PE majors request overrides in Health Sciences main office for HSC 190 and 293.

- 📖 **Request overrides on the first day of advanced registration** each semester. This date is published in the university’s academic calendar. Your overrides will be processed and waiting for you on your assigned registration date as long as the class has not filled.

- 📖 Overrides are requested in the Department of Health Sciences’ main office – Felmley Hall of Science, room 305, beginning on the first day of advanced registration. Override request forms may be printed from the Academic Advising on the Health Sciences website or may be picked up in HSC main office.

- 📖 It is recommended that you meet with the HSC advisor to create a long term plan of study for your minor in HED TE.
